

# KITSUI AWS CMS

## Scope Change Document

### **Requirements**

#### **Additional Lambda Training**

*02/05/2016*

We realised we would need to do more training into exactly how Lambda works than the overall course we were already taking. This added a quoted 10 hours of training to the first sprint.

#### **Amazon Cognito Cannot Be Used**

*16/05/2016*

We were previously led to believe we could handle all of our application's authentication needs with the Amazon Cognito service, but we unfortunately found it didn't fit our requirements. We are now working on developing our own service in house.
